Subject: Microsoft Settlement

I am writing to insert my voice under the Tunney Act proceedings in the case of US DOJ vs Microsoft.

I think the proposed settlement is a Bad Idea.

I have been writing software for 10 years: C/C++, Java, Perl mostly on a Unix platform (commercial or open source).

Microsoft products and their anti-competitive practices have caused enough damage. It is time to take decisive action and punish them enough to prevent future abuses. I do not think the proposed settlement addresses the issues.

Sincerely,
Damian Martinez
